DECLARATION OF CONFORMITY FOR MATERIALS AND OBJECTS INTENDED TO COME IN CONTACT WITH FOOD PRODUCTS

1. We hereby declare that the material (ELECTRIC MEAT GRINDER) provided exclusively for processing meat is compliant with the following EC legislation:
 - EU Regulation 1935/2004/EC, implemented according to the requirements of EU Regulation 2023/2006
 - EU Regulation No. 10 of 2011
 - Directive 2006/42/EC and subsequent updates and modifications and the following Italian legislation:
 - Ministerial Decree 21/03/1973 and subsequent updates and modifications
 - Decree no. 140 dated 11/11/2013
 - Presidential Decree 777/82 and subsequent updates and modifications
 - Ministerial Decree no. 76 dated April 18, 2007
 - Ministerial Decree no. 243 dated 01/06/1988

2. The above-mentioned material is made with:
 - AISI 304 Stainless steel
 - AISI 430 Stainless steel
 - AISI 420 Stainless steel
 - G22 cast iron with electrolytic tinplate
 - Food grade polyethylene and polypropylene (where applicable)

3. We declare that:
 - 3.1) the material does not contain substances subject to restrictions in the legislation mentioned and respects the limits of global migration (GM) and specific migration (SM) under the following conditions.
 - GM in distilled water (Simulant A) for 0.5 hours at a temperature of 20°C for parts in tinned cast iron and in stainless steel
 - GM in rectified olive oil (Simulant D) for 0.5 hours at a temperature of 20°C for parts in tinned cast iron and in stainless steel
 - SM of the Ni-Cr in distilled water (Simulant A) and rectified olive oil (Simulant D) for 0.5 hours at a temperature of 20°C for stainless steel parts
 - GM in distilled water (Simulant A) and in rectified olive oil (Simulant D) for 240 hours at a temperature of 40°C for plastic parts
 - 3.2) the assembled parts are subjected to sample release tests at specialised laboratories

4. The user of the material intended for contact with food has the responsibility to inform the company of any restriction due to the composition (additives and flavourings) of the food product to be processed.
5. Industrial or commercial use of the material indicated in this declaration does not preclude the assessment of its conformity with current standards as well its technological suitability for the intended use.
6. This declaration is valid as of the date specified below and will be replaced in the event substantial changes occur in the production of the materials that could change some of the requirements for conformity or when the legislative references mentioned in this declaration are modified or updated in such a way that a new conformity assessment is required. The declaration has a maximum validity of 24 months.
